

Kehinde Akinsiku

Chicago, Illinois +1-309-909-2087 kehindeakinsiku25@gmail.com

PROFESSIONAL SUMMARY

Full Stack software engineer with 1-year hands-on experience in software developments. I am proficient in Java, Spring Boot, HTML, CSS, JavaScript, MySQL, and React, with expertise in Agile practices, API Development and cloud-based architecture. by incorporating classroom assignments into a real-world project including a student planner app, a WordPress based winery site, and a movie scheduling system. Adaptable learner and collaborative team player with a focus on building an interactive and scalable user-friendly result.

EDUCATION

Illinois State University | Bachelor of Science, Computer Science

Aug 2022 - May 2025

City College of Chicago, Harry S. Truman | Associate of Science, Computer Science

Jan 2020 - Jul 2022

WORK EXPERIENCE

IT Support Associate | Circle K

Aug 2022- Present

- Delivered real-time technical support and logged system issues using internal ticketing tools.
- Currently expanding skills in ServiceNow to deepen knowledge of incident tracking, service requests, and escalation workflows
- Collaborated with team members for a smooth and enjoyable operations, applying to detail for a balanced tech enabled environment.
- Built strong communication and analytical skills by recognizing user experience, and attentiveness to feedback.
- Delivered clear, and responsive assistance to diverse customer support by addressing inquiries, resolving technical issues, and ensuring customer satisfaction.
- Maintained structured workflows in a fast-paced environment.

| IT & Systems Support Intern | WhyKay Graphics

Jan 2017 - Oct 2017

- Applied software engineering fundamentals including UI design to improve user centered applications
- Designed professional visual materials like event flyers, banners, and business cards using Microsoft word
- Detailed proficiency and accuracy using Microsoft word formatting and excel analysis resulting in a positive increase in productivity

PROJECTS

Student Planner Application

- Developed a Spring Boot-based backend with JPA frontend, to interact with a Model View Controller such as MySQL to store and protect user data.
- It is a full stack application based on React, HTML, CSS, JavaScript, jQuery, and Thyme
- The application has a functionality using a secured login detail, tracking daily academic activities and deadline reminders.
- Leveraged Spring Boot's dependency injection and auto-configuration for efficient development.

Musket Winery Application

- Implemented a third-party tool such as WordPress for both frontend and backend to build a responsive website
- Incorporated UI designs to deliver a visually accessible interface for user satisfaction
- Successfully deliver a fully functional website hosting it on an Apache.
- Tested and debugged the reservation system, ensuring error-free booking processes through multiple user scenarios
- Implemented a user-friendly interface for browsing for wine, making reservations for wine tasting, and managing bookings.

Movie Nights Application

- Developed backend microservices (Java) and implemented RESTful APIs for seamless data integration, using Visual Studio Code and GitHub for development and version controls.
- Employed an iterative collaboration using programming practices such as pair programming, and continuous integration.
- Managed SQL databases, employed J2EE design patterns, and utilized Git for version control and streamlined workflows.
- Utilized Gitlab CI/CD to automate deployment workflow by reducing failures and optimizing performance.

CERTIFICATIONS

- Agile Software Development

LinkedIn Learning — Completed May 2025

Gained hands-on knowledge of Agile principles, Scrum ceremonies, sprint planning, and iterative delivery in software teams.

- Introduction to Web APIs

LinkedIn Learning — Completed May 2025

Learned how to consume and interact with RESTful APIs using HTTP methods, request/response handling, and JSON data structures.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, Python, Spring Boot, Thyme leaf, HTML, CSS, JavaScript, SQL, jQuery, React
- **Concepts & Tools:** MVC Architecture, GitHub, Relational Databases, Debugging, Version Control, Object-oriented design, Linux, Visual Studio, Agile Methodologies, Software maintenance, Unit testing, Design Patterns, Data Structure and Algorithms, Code reviews
- **Soft Skills:** Problem-Solving, Cross-Functional Collaboration, Communication, Team Coordination
